Our Story

As two women, passionate about Caribbean healing traditions, we started our line of teas with one goal in mind...to share the incredible healing bounty of Caribbean nature with people all over the world.

We want to make tea drinking a functional experience without ever compromising on taste. We work with farmers, herbalists and healing gurus all over the islands of Trinidad and Tobago to capture the essence of how indigenous ingredients have been traditionally used to heal ailments and keep Caribbean people healthy throughout history.

We took these special lessons and went to work on creating delicious tea blends, minimally processed and nutritionally maximized.

Why did we choose tea? Drinking tea to heal ailments naturally has been a longstanding tradition in the Caribbean and a cherished one passed down through generations.

There is something soothing and memorable about tea that makes it the perfect remedy. After months of tinkering with different roots, herbs and plants, we perfected 5 blends that we are incredibly proud of. What happened after we introduced them to the public was more than we could have ever hoped for. People have fuelled us with encouragement to continue our dream of sharing the Caribbean healing tea tradition far and wide.

The dream continues as we aim to expand our operations and offer Caribbean Cure teas in all corners of the Caribbean and beyond!

As we expand, we stay true to our core principles, committed to offering high quality, carefully crafted products that are always... **pure. natural. honest.**
